Graphical user interface

As of March 2025, a Graphical User Interface (GUI) is being developed to aid in the processing and submission of CSB data. The GUI should lower the barrier to entry for organizations interested in becoming involved with Seabed 2030, but lacking the time or expertise to learn the programming tools required to do so. As more information becomes available on this tool, this section will be developed more fully. This toolset can be found here.
